ART THIS WEEK IN CULTURE

## Here Are This Spring's 11 Must-See Museum Exhibitions in New York

From rooftop riffs at the Met to subterranean séances at the Drawing Center, New York's current slate of showings proves that the city's institutions are anything but on autopilot as weather warms up.

### **"Amulets" by Luana Vitra**

**Where:** SculptureCenter

**When:** Through July 28

**Why It's Worth a Look:** Luana Vitra summons the spiritual charge of Brazil's mineral-rich terrain into her striking sculptural language. With tall iron totems and clay vessels acting as coded devotional offerings, her work doesn't just speak—it chants and whispers.

**Know Before You Go:** "Amulets" is Vitra's first U.S. institutional solo and an ethereal convergence of physics, chemistry, and cosmology. Expect symbolic knots, veiled offerings, and a feathered curtain that shifts the entire energy of the building. Show up open to the idea that sculpture can do more than stand still.
